To whom it may concern,

It is time for you to take action in Montreal and create a new waste management plan! It will be important to include the following:

Keeping the recovery goal of 60%
Financial measures and by-laws to help achieve the goal
establish municipal pickup of organic material for COMPOSTING; there are other municipalities out there, like Toronto, who are running successfully such plans!
Taking responsibility for our own waste by establishing landfill on the territory of the city of Montreal!

Thank you,

Nathalie Bergon
Ville St-Laurent
Quebec.
